Mission Statement

Hawkesworth (Hawkesworth Appliance Testing Ltd) is an innovative company specialising in electrical compliance services.

We are committed to excellence, transparency and a professional service - working in partnership with the leading manufacturers in the industry.

The investments we make in technology and customer care enable us to offer true value for money without compromising our quality of service.

Our values

We are honest:

Integrity is the cornerstone of our business, and we always keep our word

We are committed to excellence:

All our staff give 100% to what they do and will always go the extra mile when it comes to exceptional customer service

We are forward-thinking:

Technology is changing all the time, and we are dedicated to looking into new ways that we can further support our customers

Customer feedback

“Hawkesworth provide an excellent service each and every time, with comprehensive reports.”

Build A Bear Workshop

“Your technician is an ambassador to your company. Pleasant, friendly demeanour, nothing too much trouble and very thorough.”

Derby College

“Mitie has worked with Hawkesworth for over six years and I would not hesitate to recommend their services.”

Mitie

Electrical Equipment Testing (PAT Testing)

What is electrical equipment testing?

Electrical equipment testing is when electrical appliances are tested to ensure they are safe to use. This testing is sometimes known as PAT testing, or portable appliance testing.

Why is electrical equipment testing needed?

Electrical equipment can become damaged over time, increasing the risks of electric shock as well as the risk of fire. Electrical equipment testing will highlight what equipment you have is safe, and what you need to replace or repair.

What are your legal obligations?

Electrical equipment testing shows that the equipment in your workplace, building or rental property is compliant with the Electricity at Work Regulations 1989.

Landlords and property owners must also be compliant with:

- Electrical Safety Standards in the Private Rental Sector (England) Regulations 2020
- Electrical Safety Standards in the Private Rental Sector (Wales) Regulations 2020
- Housing (Scotland) Act 2014

Non-compliance with these guidelines can lead to fines and legal action if someone is seriously injured.

What needs to be tested?

Broadly speaking, any electrical equipment that you have to plug into a power source needs to be tested. Frequently tested equipment includes monitors, laptops, kettles, microwaves and extension leads. This is where the term 'PAT testing' can be misleading. This is because large or immovable equipment like vending machines and towel rails need to be tested too.

How often does electrical equipment testing need to be carried out?

The 5th edition In-Service Inspection and Testing of Electrical Equipment code of practice advises you should carry out a risk assessment to determine how frequently your equipment should be checked. This will take into consideration how often the equipment is used, the environment it is used in and the lifespan of the equipment.

What does the report contain?

After the inspection, you will be provided with a report. This report will contain:

- A certificate that shows that you are compliant
- An inspection schedule showing what equipment has been tested and whether it passed or failed
- Photos of equipment that has failed inspection, so you can see why it is not compliant

Organisational Policy

Overall responsibility

Overall responsibility for safety at Hawkesworth (the Company) lies with the Managing Director (MD).

This appointment has been made with due regard to the duty to satisfy Hawkesworth's responsibility under Regulation 7 of the Management of Health and Safety at Work Regulations 1999 (as amended).

It regards obtaining the services of a competent person to assist in undertaking the measures needed to take to comply with the requirements and prohibitions imposed upon the Company.

Health & Safety

The Technical Director assumes overall responsibility for the health and safety of those working on site or affected by our daily activities. They directly report to the MD.

Related duties include:

- Liaising with directors on all health and safety matters
- Providing and arranging relevant health and safety training, including induction training for new employees and engineers
- Instigating risk assessments and method statements for high-risk work activities
- Attending (where necessary) meetings where matters of safety are to be discussed
- Providing fire and emergency procedure measures and ensuring accident reporting and recording measures are working correctly
- Liaising with the MD on the investigation of reportable accidents under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR)
- Investigating accidents to determine what action is needed to prevent reoccurrence, as well as reporting to the relevant authorities
- Arranging adequate funds for implementing health and safety
- Assisting the MD in establishing the necessary procedures and records for the successful monitoring, reporting and control of the Company's health and safety obligations
- Formulation and implementation of the Company's health and safety policy
- Liaison with staff, managers, customer representatives and sub-contractors on health and safety related matters
- The provision of health and safety advice as well as regular site safety audits and inspections
- Assisting the MD in setting, agreeing and monitoring key performance indicators through the business improvement plan (BIP)
- Ensuring that the health and safety information pack is regularly reviewed and updated

In no circumstances may the Technical Director's decisions in regards to health and safety be over-ridden by staff, visitors or contractors.

Engineers

Day-to-day health and safety on site will be the responsibility of individual engineers. They are responsible for maintaining health and safety standards on site, as well as their personal safety.

Engineers report directly to the Technical Director on health and safety as well as general work-related matters.

Administration

The Technical Director is responsible for the administration of the health and safety policy and all associated paperwork, including the keeping of records required by law.

Copies of employer's personal files are kept by the Technical Director together with ongoing and updated information (for example, training dates and copies of certificates).

Should an employee receive an informal or formal warning in regards to health and safety, details of the incident must be forwarded to the Technical Director immediately.

All accidents are reported and copies of the accident reports forwarded to the Technical Director. These reports are reviewed to see if any amends need to be made to our existing policies.

If needed, third-party support will be brought in to help solve health and safety issues that we cannot resolve in-house.

Our policies

We take our responsibilities seriously and as such we have a range of policies in place, that are updated regularly to complement this.

Policies include but are not limited to:

- Health & Safety Policy
- Environmental Policy
- Quality Policy
- Equality Policy
- GDPR Policy

Copies of the above policies will be shared separately, in addition to, this information pack.
